ELECTION REFORMS.

G. C. Mathews, a thoughtful essavist, whom we have before had occasion to notice, has a paper in the Current on elections, in which he declares that every new election in this country emphasizes the necessity for reformation and improvement of the laws governing elections. One of the needed modifications of our system is the separation of the Federal and State elections. Mr. Mathews finds the obstacle to that end to be the increased expense and number of elections. It does not appear

to have suggested itself forcibly to him that in all the States, as in New York, separate ballot-boxes can be used, and thus a separation be secured. He notices with pride that while there has been an everimpending danger to our country from the nice questions of jurisdiction arising between State and Federal Courts, "It stands to the lasting credit of the Federal In San Francisco Mexican dollars are quoted judiciary that dangerous conflicts have not come about." * * * "A Federal judi-

In which conclusion A stage was robbed yesterday between San the law are alive to the very dangerous situations that may and do arise relative to day in Springfield. Ill., and were largely at- as he says, that we have enjoyed immunity from an outbreak thus far must not be taken as assurance of safety. One of the paths to greater security is a separation of the two elections named, and thus prevent a conflict of jurisdiction between Federal and State authority. Mr. Mathews holds to the doctrine that the integrity of the ballot is best conserved by making it subject to the adjudication of the election judges alone. In this statement we are not prepared to concur. We do not see that such a rule in New York has tended to essen fraud, or to decrease corruption at the ballot-box; nor that the preservation and review of the ballots, as in other States, has increased corruption or multiplied opportunities for fraud upon the ballot. But we are ready to admit that the question is a debatable one.

PEACE PROBABLE.

It appears to be turning out as we anticipated, that there will be no war between Russia and England because of the bill passed by the Legislature just before its ad- boundary question. It did not need prophetic powers to make the suggestion. It called only for a calm and studious observation of the situation, and a careful examination of the literature of the whole subject. That disclosed to whosoever wished to know the fact that neither nagrow out of the difficulty, it would be the result of any other influence than wisdom. Passion, assumed or real insult, the clamor party, the ambition for conquest and comnercial advantage-all these may lead nations into war. But when neither of two given parties has a desire to do battle when both realize that there is a peaceful understand that at the end of a war they will be no further advanced, they are quite certain to find open roads to peaceful settlement. This is the case with Russia and England. They may set at each other and shed blood; but the statesmen of each

His so-called aristocratic birth and his long-continued sway in Delaware have, doubtless, contributed to this, and allowance must be made for him. His strong opposition to the appointment of Thurman, for instance, is ascribed solely to a jealousy dating several years ago, when Thurman was the acknowledged leader and the ablest member of the Senate, overshadowing Bayard. Washington, April 16th.—The Presiden

and the heads of the various departments are daily besieged by politicians from Ohio and Oregon, who urge upon them the ne oublican office-holders in those States, and the appointment of Democrats to succeed them, in order to strengthen the party for the coming fall elections. The Democrats of Oregon represent that they can carry the next Legislature, and thus secure a Senator to fill the term now vacant because of the neglect of the Republican majority to choose a successor to Slater, if the Admin istration will oust the Federal officials who make use of their places for political ends. The President is not asked to make changes simply for the purpose of helping his party, but the request is that he shall make certain removals, because, as is alleged, the incum bents are political managers, who give most repeated. Holy Cross. Every member of our Club, writes Mr. J. AN IMPORTANT FOOD REFORM.

Production of Chemically Pure Cream of Tartar-Iotal Elimination of all Lime Impurities-New Discoveries in Refining-A Long Stride Toward Pure Food. [From the New York Tribune.] Discoveries of much importance on ac ount of the relation they bear toward a more wholesome food supply, and consequently upon the public health, have been recently made in the process of refining

cream of tartar. Cream of tartar, as i well known, is a bitartrate of potassia puri fied from the crude tartar, or argol, which collects in a crystalline deposit upon the bottom and sides of wine casks during the fer mentation of the wine. This tartar, in its crude state, contains lime and other impu rities, which no process of refining known prior to that here described was able to entirely remove. It has been possible, it is true, to neutralize the lime to some exten by the aid of chemicals, and this method was resorted to in order to procure cream o tartar in small quantities for pharmaceutical purposes; but it was open to serious ob jection in view of the fact that the chemi cals employed for this purpose were not always washed out, but remained in quantities that were uncertain and prejudicial to its quality. The supposed impossibility of removing the lime has, accordingly, caused cream of tartar to be classed and sold as pure when it did not contain more than five per cent. of this impurity. The major part however of that used in commerce or for culinary purposes, contains the tar trate of lime to an extent much greater than five per cent., not infrequently being found, upon analysis, debased to a degree equaling one-fourth or more of its entire

In a report upon the subject of food adul eration made to the New York State Board of Health, by Professors Chandler and Love, it is stated that of 27 samples of cream of tartar bought from dealers as pure, 16 were adulterated with various substance from 3 to 93 per cent., while of the remain der all contained tartrate of lime, some as high as 10.59 per cent. The serious character of this adulteration

is more readily appreciated, when it is recollected how largely cream of tartar en-ters into the preparation of the food of every family. In connection with soda in baking powder, it is the chief agent now employed for raising and making light and digestible all our biscuit, cake and other Cabinet: "I hope to have the same honor that President Pierce enjoyed at the end of his term of office, that of retiring to priall leavening purposes, so that it is em ployed to some extent in almost every mea of which we eat. The amount of cream o tartar used in this country in a year, in bak ing powder and otherwise in the prepara ion of food, is estimated at ten million pounds. If this were 90 per cent. purenigh estimate-we would consume on million pounds or more of lime annuall as a substitute for bread. So large a dete rioration becomes appreciable in the depri vation of our food of a portion of its nutri tive elements not only, but if, as is now supposed, this excess of lime taken into the system has a relation to the painful affect ions of the kidneys so prevalent in this country, its bearing upon the health of the entire community is too important to be overlooked.

The new process by which cream of tar tar is produced 100 per cent. pure-that is with the lime totally eliminated-by treat ing the crude material under pressure in stead of using any chemicals whatever fo New York, April 16th. — Inspector Byrnes said the detectives detailed to look a German chemist, but has been developed a German chemist, but has been developed a German chemist. ap the New York end of the St. Louis and perfected by the Royal Baking Powder murder, nave ascertained beyond a doubt that Maxwell has never been in New York with Preller Mr. Schlesinger a scale of a few years since in behalf of a high standard of purity in food, the public was rid of the poisonous alum baking powders at tha time so prevalent.

The determination of this Company to

further doubt that Preller was murdered for his money. Byrnes has telegraphed all his information to the police at St. Louis from the cream of tartar of commerce, made it apparent that some new method must be sought by which cream of tartar could be procured in large quantities, free from lime and chemically pure. The cream of tarta refiners of this country and Europe, when approached upon the subject, declared such a result impossible, and declined to incu the expenditure necessary to make the trial solved to solve the problem for itself; and having secured the aid of the best chemists of Europe and America, proceeded with its investigations and discoveries until the result, after several years of labor and the expenditure of over half a million dollar in the purchase of patents, perfecting of processes, and the erection of buildings an machinery, was reached in the complete attainment of the end sought. The work now owned by the New York Tartar Co. are located in Brooklyn, and exceed in siz and capacity any other similar refinery i the world. They produce a chemically pur cream of tartar, which is now exclusion

used for pharmaceutical preparations n the manufacture of the celebrated Roya Baking Powder. The energy and outlay that have effected this will undoubtedly be fully rewarded by the public, which will chiefly benefit by th accessful issue of the investigations. Peo ple are coming daily to more fully appre food. By the exclusive use of this chem ally pure cream of tartar, the Royal Bak ing Powder is produced entirely free from lime, and absolutely pure, qualities pos-sessed by no other baking powders ye made. A baking powder entirely free fro lime or other impurity must not only con tain more strength or leavening power, and produce better food, and therefore be mor economical for use, but what is more in

portant, possess qualities of superior wholeomeness. Chemists and physicians have looke upon the experiments with much interest and regard their success as a matter of much importance. PRESENTERY OF SACRAMENTO-The town

State Treasurer Oullahan indorsed that amount on the back of the certificate, and gave him a receipt for the money which was accepted by the Controller. This transaction is in accordance with an Act passed at the last session of the Legislature which reads as follows: "In all cases where, prior sto the passage of this Act, the County Treasurers of this State have deposited money in the State Treasury, and taken the receipt of the State Treasury, and taken the receipt of the harness, carriage and work horses, many of State Treasurer therefor, which receipt of the cites that the 'deposit is to be applied in his next settlement with the State Controller,'

State Treasurer therefor, which receipt recites that the 'deposit is to be applied in his next settlement with the State Controller,'

Such receipt of the animals was about \$20,000. Several of the animals such receipt shall be received by the State Treasurer from any of such County Treas-Treasurer from any of such County Treasurers, or their successors in office, for the and fillies, and of course the prices will be sum named on the face of such receipt, in very much larger than those of yesterday payment of any sum required by law to be paid to the State by any such County Treas- horses. JACKETS VS. VISITES.

Fashion stands this season about equally balanced between the Jacket and the Visite. The former is the favorite for young ladies and misses, and is, also, the accepted fatigue wrap for women of all ages. The Visite, in some one or other of its many modifications, is, on the other hand, the full-dress wrap of the day. Consequently every lady needs both garments—the lacket for morning, for cloudy days and for traveling, etc., and a Visite for calling, evening and other dress occasions.

Our stock of Jackets includes among other attractions, fine Jersey Cloth Coats and Pelisses, \$5 and \$7 50 respectively.

Stylish Visites, in many styles, \$5, \$7 50, \$10, \$12 50,

The above applies to our new SPRING DRESS SUITS, MIDDLESEX FLANNEL SUITS, SEERSUCKER AND ALPACA CLOTHING, IMPORTED WORSTED PANTS, NORFOLK PLAITED COATS, BOYS' CLOTHING, ETC.

Boys' All-wool Blouse Suits, with "Cavalry Knee" (a double thickness of cloth over the knee), \$4, \$4, 50,

[SPECIAL DISPATCRES TO THE RECORD-UNION.]

England and Russia Apparently Friends Again. LONDON, April 16th.—The Telegraph publishes a dispatch from Vienna, which states that De Giers has telegraphed Baron de Staal at London as follows: "I am charged, by the Czar's personal command, to request you to inform the English Government that in the Czar's opinion war would be most deplora ble to both countries. Also that the Czar firmly hopes that prompt and simple arrangement of present difficulties may be established." Staal telegraphed De Giers in reply that "the English Government gladly accepted his communication. Lessar, special envoy of Russia, in an interview to-day, says arrangements for the cession of Penjdeh to Russia had not yet been completed, but negotiations were proceeding favorably.

ANOTHER REPORT FROM KOMAROFF. ST. PETERSBURG, April 16th.—The Official Messenger published this morning a telegram from General Komaroff, which states that, the remnant of the Afghan detachment, defeated in the Kuskh river engagement, fled to Herat. Komaroff also states that the losses of the Afghans largely e ceeded the first estimate. Many perished as they struggled through the rough country on their retreat to Herat. The weather was intensely cold, and snow had been fall ing for twelve days. The Afghans have burned their camp at Balamurghab, which Sir Peter Lumsden abandoned. A provis ional government is being orga Penjdeh, to prevent anarchy. The Russian detachment remains at Dashkepri. The dispatch concludes with the statement that there is no necessity for a forward move ment at present.

IS RUSSIA SEEKING TO GAIN TIME? VARNA, April 16th.—There is an impres sion here that Russia is seekin to gain tin only to complete preparations to march or Herat, and purchase in America a few more vessels. DENIALS FROM GLADSTONE. London, April 16th.-Gladstone, in the House of Commons this afternoon, said the Government had no reason whatever to believe that any such demand had be established as that reported as Russia's de-mand for Penjdeh. There is no reason whatever to believe that any such deman has been made, and no assurances have been given or received by either Govern ment regarding any particular points the Afghan frontier. In answer to oth questions concerning the Afghan difficult Gladstone denied the story published in the Daily Telegraph to-day, to the effect t the Czar had officially expressed his opinic that war would be deplorable to both cou tries, and hoped that prompt and simpl arrangements would be established. Gladstone said there had been friendly conversations (laughter) between Ear Granville and the Russian Embassador and others competent to assist, but no assur-ances had been given or received regarding the points on the disputed frontier stone had no doubt that Russia had a pointed an administration of Penjd [Laughter.] The Premier said that thou he had not been present at the convers tions referred to [jeers], he had no reaso to believe that any suggestion or deman had been made by Russia up to the presen

GENERAL GRANT. Is the Old Hero Dying Because of Medical Intolerance?

The American Homocopathist has an article on the treatment of General Grant by the allopaths, in which it says: General Washington was murdered by his medical attendants; but at least they were heroically—too heroically endeavoring to extinguish the disease. Their brutality was of the active sort, and in purpose commendable, though disastrous in result. General Garfield was maltreated for months under an error of diagnosis, and at last escaped beyond the reach of his eminent torturers. Here, also, there was much medical heroism and activity displayed, albeit misdirected. Other illustrious patients have suffered from eminence in the profession; but General Grant seems reserved as a shining example of cold-blooded expectancy.
